EXAMINATION REPORT - SEPARATE SHEET

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

- 1. The subject-matter of claim 16 is not clear due to reference to the description and drawing 3; the requirements of Article 6 PCT and Rule 6.2(a) PCT are not met (see point 3 of Item VIII below). The lack of clarity is such that no opinion in respect of Article 33(1) PCT can be formulated.
- 2. The subject-matter of claims 1-14 are inadequately supported by the description such that a complete and meaningful opinion w.r.t. Article 33(1) PCT could not be formed. Support is not present for the claims across the breadth of their presently broad definition (see section VIII below). A meaningful opinion, although incomplete, has been formed for claims 1,2,15 (see section V below).

Re Item V

ì

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 1. Reference is made to the following documents:
 - D1: PATENT ABSTRACTS OF JAPAN vol. 6, no. 35, (1982-03-03), abstract of JP 56 155034 A (NT&T CORP.), 1 December 1981.
 - D2: PATENT ABSTRACTS OF JAPAN vol. 4, no. 151, (1980-10-23), abstract of JP 55 095638 A (HITACHI LTD.), 21 July 1980.
- 2. With reference to the restriction mentioned above in Section III; the application does not meet the requirements of Article 33(1) PCT in the sense of Article 33(2) PCT for the following reasons:-
- 2.1. Document D1 discloses a burner for synthesizing and depositing glass particles using an atomiser producing an aerosol stream suitable for producing doped waveguides. The burner comprises many concentric ports and conduits, in particular a central inlet port and corresponding central conduit for the liquid feed to produce the aerosol. The reservoir 26 has an associated chamber between parts 26 and 26a which is suitable to function as a "gas expansion chamber",

given the broad technical meaning that may be reasonably assigned to the latter expression.

Consequently, the subject-matter of claims 1, 2 and 15 of the present application is not new.

- 2.2. Independently of the opinion above in point 2.1, document D2 similarly discloses a burner suitable for aerosol doped deposition, comprising inlet ports 3,5,7, of which nozzle 5' delivering the liquid enters chamber 10 is suitable to function as a reservoir and "gas expansion chamber".
 - Consequently, the subject-matter of claims 1, 2 and 15 of the present application is not new w.r.t. document D2.
- 2.3. Claims which do not meet the requirements of novelty cannot meet the requirements of inventive step. Thus claims 1,2,15 do not meet the requirements of Article 33(1) PCT in the sense of Article 33(3) PCT.
- 2.4. Claims 1,2,15 meet the requirements of Article 33(1) PCT in the sense of Article 33(4) PCT, as the burner may be used in the manufacture of doped glass optical waveguides.

07/08/1998

This document would appear to be prejudicial to the novelty of at least claim 1 of the present application (see figure 4) w.r.t. regional/national phase of PCT procedure.

Re Item VII

Certain defects in the international application

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

- Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art 1. disclosed in the documents D1 and D2 is not mentioned in the description, nor are these documents identified therein.
- 1.1. A document reflecting the prior art described on page 2, lines 11-12, is not identified in the description (Rule 5.1(a)(ii) PCT).

Re Item VIII

Certain observations on the international application

- 1. Claims 1-14 are not fully supported by the description as required by Article 6 PCT, as their scope is broader than that which may be considered reasonably justified by the contribution to the art as disclosed by the description and drawings. The reasons therefor are the following: Support and disclosure is only present for a burner as defined in claim 1 in combination with the features of claims 2 and 15, namely that the "gas expansion chamber" of the "at least one inlet port" is in the form of a reservoir chamber suitable for providing a liquid dopant solution in the form of aerosol droplets to the associated torch conduit. This is clear from the description where the applicant describes the modification made to known prior art burners and the problem solved thereby as well as from the specific embodiments and figures related thereto (cf. page 1, lines 5-10; page 2, lines 11-23; page 6, line 9 to page 7, line 20 w.r.t. figure 3). Reference is made to Section III above.
- It follows from 1. immediately above that the said features "reservoir" and 1.1 "suitable for providing aerosol ... " are essential to the definition of the invention; otherwise the desired technical effect will not be present and so the technical problem not solved. By omitting these features, independent claim 1 does not meet the requirement following from Article 6 PCT taken in combination with Rule 6.3(b) PCT, that any independent claim must contain all the technical features essential to the definition of the invention.
- Independent claim 1 is not in the two-part form in accordance with Rule 6.3(b) 2. PCT, which in the present case would be appropriate (as implied from the

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

• • • •

statement by the applicant in the description, i.a. on page 1, lines 6-7), with those features known in combination from the prior art (e.g. document D1 or D2) being placed in the preamble (Rule 6.3(b)(i) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT).

- 2.2. By not using the two-part form for the independent claim combined with not citing any relevant prior art in the description, the requirements of Article 6 PCT taken in combination with Rule 6.3 PCT and Rule 5.1(a)(ii)&(iii) are not met (see the PCT Guidelines, III-2.3a), for it is not clear what the contribution to the art is, without placing undue burden on the skilled reader.
- Claim 16 contains only references to the description and the drawings. According 3. to Rule 6.2(a) PCT, claims should not contain such references except where absolutely necessary, which is not the case here. The claim should be deleted.
- The vague and imprecise statement in the description on page 9, lines 19-24 4. implies that the subject-matter for which protection is sought may be different to that defined by the claims, thereby resulting in lack of clarity (Article 6 PCT) when used to interpret them (see also the PCT Guidelines, III-4.3a). The statement should be deleted.
- Many of the claims for a burner are defined at least in part by terms of its function 5. or intended use, e.g. claims 1,2,6-9,15. Lack of clarity results because the intended scope w.r.t. the burner is not clearly defined, contrary to the requirements of Article 6 PCT.

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

- 1. The subject-matter of claim 16 is not clear due to reference to the description and drawing 3; the requirements of Article 6 PCT and Rule 6.2(a) PCT are not met (see point 3 of Item VIII below). The lack of clarity is such that no opinion in respect of Article 33(1) PCT can be formulated.
- 2. The subject-matter of claims 1-14 are inadequately supported by the description such that a complete and meaningful opinion w.r.t. Article 33(1) PCT could not be formed. Support is not present for the claims across the breadth of their presently broad definition (see section VIII below). A meaningful opinion, although incomplete, has been formed for claims 1,2,15 (see section V below).

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 1. Reference is made to the following documents:
 - D1: PATENT ABSTRACTS OF JAPAN vol. 6, no. 35, (1982-03-03), abstract of JP 56 155034 A (NT&T CORP.), 1 December 1981.
 - D2: PATENT ABSTRACTS OF JAPAN vol. 4, no. 151, (1980-10-23), abstract of JP 55 095638 A (HITACHI LTD.), 21 July 1980.
- 2. With reference to the restriction mentioned above in Section III; the application does not meet the requirements of Article 33(1) PCT in the sense of Article 33(2) PCT for the following reasons:-
- 2.1. Document D1 discloses a burner for synthesizing and depositing glass particles using an atomiser producing an aerosol stream suitable for producing doped waveguides. The burner comprises many concentric ports and conduits, in particular a central inlet port and corresponding central conduit for the liquid feed to produce the aerosol. The reservoir 26 has an associated chamber between parts 26 and 26a which is suitable to function as a "gas expansion chamber",

EXAMINATION REPORT - SEPARATE SHEET

given the broad technical meaning that may be reasonably assigned to the latter expression.

Consequently, the subject-matter of claims 1, 2 and 15 of the present application is not new.

- 2.2. Independently of the opinion above in point 2.1, document D2 similarly discloses a burner suitable for aerosol doped deposition, comprising inlet ports 3,5,7, of which nozzle 5' delivering the liquid enters chamber 10 is suitable to function as a reservoir and "gas expansion chamber".
 - Consequently, the subject-matter of claims 1, 2 and 15 of the present application is not new w.r.t. document D2.
- 2.3. Claims which do not meet the requirements of novelty cannot meet the requirements of inventive step. Thus claims 1,2,15 do not meet the requirements of Article 33(1) PCT in the sense of Article 33(3) PCT.
- 2.4. Claims 1,2,15 meet the requirements of Article 33(1) PCT in the sense of Article 33(4) PCT, as the burner may be used in the manufacture of doped glass optical waveguides.

25/06/1999

07/08/1998

This document would appear to be prejudicial to the novelty of at least claim 1 of the present application (see figure 4) w.r.t. regional/national phase of PCT procedure.

Re Item VII

Certain defects in the international application

- 1. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1 and D2 is not mentioned in the description, nor are these documents identified therein.
- 1.1. A document reflecting the prior art described on page 2, lines 11-12, is not identified in the description (Rule 5.1(a)(ii) PCT).

Re Item VIII

Certain observations on the international application

- 1. Claims 1-14 are not fully supported by the description as required by Article 6 PCT, as their scope is broader than that which may be considered reasonably justified by the contribution to the art as disclosed by the description and drawings. The reasons therefor are the following:
 Support and disclosure is only present for a burner as defined in claim 1 in combination with the features of claims 2 and 15, namely that the "gas expansion chamber" of the "at least one inlet port" is in the form of a reservoir chamber suitable for providing a liquid dopant solution in the form of aerosol droplets to the associated torch conduit. This is clear from the description where the applicant describes the modification made to known prior art burners and the problem solved thereby as well as from the specific embodiments and figures related thereto (cf. page 1, lines 5-10; page 2, lines 11-23; page 6, line 9 to page 7, line 20 w.r.t. figure 3). Reference is made to Section III above.
- 1.1 It follows from 1. immediately above that the said features "reservoir" and "suitable for providing aerosol ... " are essential to the definition of the invention; otherwise the desired technical effect will not be present and so the technical problem not solved.
 By omitting these features, independent claim 1 does not meet the requirement following from Article 6 PCT taken in combination with Rule 6.3(b) PCT, that any independent claim must contain all the technical features essential to the definition of the invention.
- 2. Independent claim 1 is not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate (as implied from the

statement by the applicant in the description, i.a. on page 1, lines 6-7), with those features known in combination from the prior art (e.g. document D1 or D2) being placed in the preamble (Rule 6.3(b)(i) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT).

- 2.2. By not using the two-part form for the independent claim combined with not citing any relevant prior art in the description, the requirements of Article 6 PCT taken in combination with Rule 6.3 PCT and Rule 5.1(a)(ii)&(iii) are not met (see the PCT Guidelines, III-2.3a), for it is not clear what the contribution to the art is, without placing undue burden on the skilled reader.
- Claim 16 contains only references to the description and the drawings. According 3. to Rule 6.2(a) PCT, claims should not contain such references except where absolutely necessary, which is not the case here. The claim should be deleted.
- The vague and imprecise statement in the description on page 9, lines 19-24 4. implies that the subject-matter for which protection is sought may be different to that defined by the claims, thereby resulting in lack of clarity (Article 6 PCT) when used to interpret them (see also the PCT Guidelines, III-4.3a). The statement should be deleted.
- 5. Many of the claims for a burner are defined at least in part by terms of its function or intended use, e.g. claims 1,2,6-9,15. Lack of clarity results because the intended scope w.r.t. the burner is not clearly defined, contrary to the requirements of Article 6 PCT.

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This Inter	rnational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
السا	Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
	see FURTHER INFORMATION sheet PCT/ISA/210
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This Inter	mational Searching Authority found multiple inventions in this international application, as follows:
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report
، لــا ه	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. N	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark o	on Protest The additional search fees were accompanied by the applicant's protest.
	No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Present claims 1-16 relate to a large number of possible burner configurations. Support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT is to be found, however, for only a very small proportion of the burner configurations claimed. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is not possible. Consequently, the search has been carried out for those parts of the claims which appear to be supported and disclosed, namely those parts relating to burner configurations including a "gas expansion chamber" in the inlet port suitable for providing an aerosol to said burner amnd located upstream of the said gas mixing region.

The search has covered burner configurations of the general type defined in claim 1 and which are suitable for use with an aerosol delivery and where the gas expansion chamber is located in the inlet port or feed line intended to be used for feeding an aerosol, whether the aerosol is a dopant or glass forming material (refer also to claim 15).

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
